

Seminar 5

Write a report based on the Zachman framework for your case study that includes:

- I. Title (name of a business)
- II. Names of the members, Group name
- III. Try to fill in (describe) the first row of the Zachman framework (see Table 1)

Table 1
The Zachman Framework for Enterprise Architecture (based on [38,43])

	DATA (What?)	FUNCTION (How?)	NETWORK (Where?)	PEOPLE (Who?)	TIME (When?)	MOTIVATION (Why?)
SCOPE (Contextual) <i>Planner</i>	List of things important to the business	List of processes the business performs	List of locations in which the business operates	List of organizations important to the business	List of events significant to the business	List of business goals/strategies
BUSINESS MODEL (Conceptual) <i>Business Owner</i>	E.g. Semantic Model	E.g. Business Process Model	E.g. Business Logistics System	E.g. Work Flow Model	E.g. Master Schedule	E.g. Business Plan
SYSTEM MODEL (Logical) <i>Architect</i>	E.g. Logical Data Model	E.g. Application Architecture	E.g. Distributed System Architecture	E.g. Human Interface Architecture	E.g. Processing Structure	E.g. Business Rule Model
TECHNOLOGY MODEL (Physical) <i>Designer</i>	E.g. Physical Data Model	E.g. System Design	E.g. Technology Architecture	E.g. Presentation Architecture	E.g. Control Structure	E.g. Rule Design
DETAILED REPRESENTATIONS (Out of context) <i>Sub-Contractor</i>	E.g. Data Definition	E.g. Program	E.g. Network Architecture	E.g. Security Architecture	E.g. Timing Definition	E.g. Rule Specification
FUNCTIONING ENTERPRISE	E.g. Data	E.g. Function	E.g. Network	E.g. Organization	E.g. Schedule	E.g. Strategy

- IV. Try to transform the conceptual model like Figure 1 as an example (that has been created in the seminar 4) to a relational data model (see Figure 2 as an example)

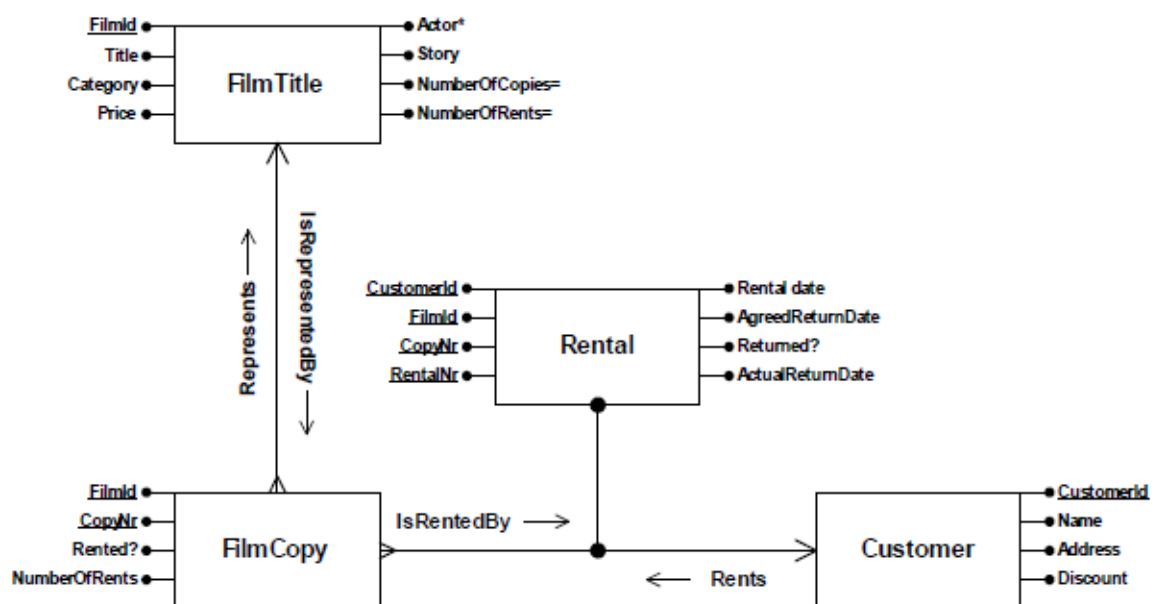

Figure 2. Relational data model for the video renting example.
